Divide + Conquer

Some environments call for defining spaces with materials that help conquer unwanted organisms. Compel offers a variety of in-stock screens and dividers in a variety of materials, providing the right type of space division to conquer your return-to-work requirements.

In addition to our standard in stock solutions, Compel produces custom sizes and formats to deliver a solution tailored to virtually any working environment. Contact us to discuss your custom screen solution.

All prices shown in list and are subject to change.

Upright Screen Brackets

Our collection of upright screen brackets attach to the underside of the worksurface, either screw in or clamp on, leaving the top of your workstation open and undamaged. They accommodate 1" and 1 1/8" thick worksurfaces and a wide variety of screen materials up to 3/8" thick.

Transaction Top Brackets

A freestanding version of our upright screen brackets, our transaction top brackets feature a steel footplate that allows for zero attachment points. Simply set it on the surface and move as needed. The bracket channel accepts a wide variety of screen materials up to 3/8" thick and it securely accommodates higher screens.

Telescoping Territory Frame

For space division that goes beyond the worksurface, Compel's Telescoping Territory Frame is the answer. The telescoping frame accommodates screen widths from 24" to 48". Two bracket heights allow for rectangular screens and inverted L-shaped screens that nest over a worksurface with no attachment points.

HiLo Hub

Compel's HiLo Hub not only provides power and data distribution to HiLo Benching, but also provides full space division with its expansive screens. Available in 48", 60" and 72" widths, the HiLo Hub accommodates screens heights up to 60" from the floor. Available in both National and Chicago Code power.

Universal Clamp

Compel's most versatile screen mounting option, the Universal Clamp attaches to the underside of the worksurface and allows the user to customize the amount of privacy and modesty the screen provides. The Universal Clamp can be used on a freestanding workstation or at the end of a run of Pivit Benching. The Universal Clamp adjusts to fit virtually any substrate

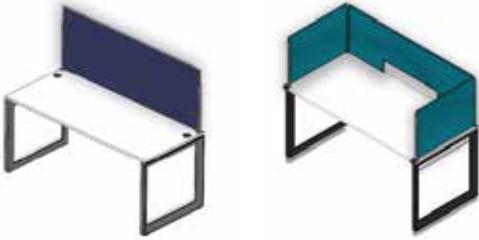

*All mounting brackets and frames are available in Black, White and Silver to complement Compel's Pivit Metal Legs, HiLo Bases and Mobile BFF.

Worksurface Mount Brackets & Screens

Common Sizes	PET Felt: .5"	Laminate: .375	Acrylic: .354"	Vinyl	Polyurethane	Silicone
