American Crafted

By **compel**®

**FORGE AHEAD.**

Nothing embodies the American spirit quite like that statement. It's that spirit that inspired our new American-made line, **FORGE.**

## **FORGE FOUNDATION**

Our line of Forge casegoods and meeting tables are crafted in America's heartland from high performance thermally fused laminates in rich woodgrains.

## layered walnut

Premium, American acoustic guitar builder, Taylor Guitars, was the inspiration behind Layered Walnut. A trademark of Taylor Guitars is the use of layered woods, which is done to achieve both superior sound quality and forestry preservation. The look of Taylor's Layered Walnut evokes the warmth and richness we wanted to bring to our new Forge line.

## hackberry

Commonly heralded by tree experts as “one tough tree”, the Hackberry is a beautiful hardwood native to America. The Hackberry thrives in a broad span of temperatures and on sites that vary from 14" to 60" of annual rainfall. They even stand up to strong winds and air pollution. The adaptability and hardiness of this species inspired the Forge Hackberry finish.

## details for the discerning

Drawer fronts proudly display matching vertical graining. Modesties feature horizontal graining, allowing the eye to follow the desk top. Matching edge banding finishes off the rich effect.

## heavy metal

Desk tops and meeting tables feature cable management grommets in solid metal. Clean linear ledge pulls reinforce the solid structure and aesthetic of Forge. Metal elements are available in Anthracite, a sleek black finish.\*

\*Additional metal finishes will be added throughout 2021.

desking

## desking

Complete casegoods line consists of desks, bridges, returns, credenzas, and storage, including laterals, pedestals, hutches and storage cabinets.
